The new way to express your emotions

The Venova is a completely new type of wind instrument designed to enable anyone to learn to play with ease. Despite the simple fingering, it sounds just like a saxophone. Take this novel opportunity to transform your breath into richly expressive sound. Choose from one of two models to suit the musical range you want to play in.

Alto Venova YVS-120 **NEW**

- A mellow tone similar to an alto saxophone
- With a larger size than the YVS-100, the Alto Venova makes it even easier for beginners to make music.

Venova YVS-100

- A bright tone similar to a soprano saxophone
- Compact and lightweight to expand the range of venues and opportunities.

Form follows technology

Innovation and creativity do not come about by accident. Without going into the technical details, the unique shape of the instrument, which produces the sound of a full-size saxophone with much less body, is the result of many years of research.

Explore where you play and how you feel

The compact, lightweight Venova is so easy to transport and maintain that you can enjoy it anywhere. Play the Venova at your favorite places to experience an unexpectedly fresh kind of freedom.

High water-resistance for worry-free playing

The durable ABS resin body is water washable, with a simple structure that's easy to clean.

Easy fingering similar to a recorder

The fingering is simple and easy even for beginners.

A rich, expressive tone that plays naturally

Like the saxophone, the Venova is a single-reed instrument that sounds different depending on how hard or soft you blow.
